Juan Ignacio Luraschi

Software Engineer

Work Experience

FEBRUARY 2023 – present
Practia

Full Stack Developer

- Fulfilling the function of Sr. Full Stack developer, in .Net Framework and .Net Core (C #), as well as frontend operation tasks in ReactJS.
- Collaborated in software functional analysis with clients to translate their requirements into actionable product backlog items.
- I conduct audits of development processes and assist in transitioning to Agile methodologies.

2020 – 2023
PhoneIQ

Full Stack Developer

- Responsible for backend development in both .Net Framework and .Net 6 (C#), alongside frontend tasks in AngularJS.
- Working on the migration of the product, to new microservices in .Net 6. Adjusted design and architecture patterns to boost performance and incorporate new features. Importantly, I acquired expert knowledge on all aspects of Salesforce platform and Twilio communication API.
- Orchestrated efficient large-scale software deployments, implemented Azure DevOps methodologies, facilitating streamlined continuous integration (CI) processes.

DECEMBER 2021 – FEBRUARY 2022
Protect Group

Full Stack Developer

- Conducted backend development using .Net Framework and .Net Core (C#), in addition to frontend operations utilizing ReactJS.
- Assisted with technical design and development.
- Assisting with the recruiting process of Uruguayan employees.

MARCH 2019– AUGUST 2019
Universidad Ort

Assistant Professor “Application Design 1”

- Reviewed and assist students with curricula topics and assignments - .NET Framework and .NET Core for students.
- Assist on theory and practice principles related to: SOLID Principles, GRASP Patterns, design patterns, Clean Code, and others.
- I served as Deputy Professor for 3 months, when the Full Professor was on leave

Education

2016–2023
Universidad ORT Uruguay

Software Engineering

2019–2020
Universität Paderborn Deutschland

Computer Science Master subjects as Student exchange
